**The SUV will crank, run, and drive, engine runs great but does have a bit of a shake/miss, transmission shifts through all gears with no issues, the brakes seem to be a little weak, they work but you often have to press your foot to the floor, tires will need to be replaced in the near future being that the tread is pretty much gone, A/C is blowing cold, the exterior is in good condition but it does have some damage to the clear coat on the hood and roof of the car, the interior is also in good condition with the only flaw being the stains on some of the seats, when you go to crank the unit it has a weird noise that sounds like the doors are locking and unlocking but after cranking and driving it, the noise stops, does have an engine code and is listed above. Come check this unit out for yourself!**

## **Engine Code-**

**P0340- Camshaft position sensor A circuit Bank 1 or single Sensor**
